

POSTDOCTORAL RESEARCHER NEEDED

LSU Civil and Environmental Engineering Assistant Professor Matthew Brand is hiring a postdoctoral researcher to study the economics and financing of coastal green and gray infrastructure.

The expectations for this position are:

- 50% effort on an NOAA-funded Effects of Sea-Level Rise project on quantifying the benefits and costs of coastal green and gray infrastructure for the purposes of sea-level rise adaptation in the Pacific Northwest.
- 50% effort on investigating how wetland and floodplain restoration can be funded through reductions in flood risk and other ecosystem co-benefits using continental scale flood models developed by the University of Bristol and Fathom.

To apply, please use the following link, and make sure to include your CV (with references) along with a one-page cover letter/statement of research interests.
