We are seeking a graduate student, preferably a PhD student for urban stormwater studies. The research includes integrated laboratory and modeling investigation to assess performance of Stormwater Best Management Practices (BMPs). A background in hydrological modeling, water quality, or unsaturated zone flow and chemical transport is needed. The start date for the project is January 2021. Applications must include a cover letter, CV, and contact information for three references. Applications are accepted until position is filled. Please submit your materials via email to Dr. Mengistu Geza at stu.geza@sdsmt.edu
