

# Position Profile

# Assistant Professor in Hydrologic & Water Science

The Department of Geological Sciences in the Jackson School of Geosciences at The University of Texas at Austin seeks to hire a tenure-track Assistant Professor in Hydrologic and Water Science. We seek candidates at the forefront of their science and who have interdisciplinary research and teaching interests. This search covers a wide range of disciplines related to water. Candidates interested in chemical, physical, and ecological processes and water resource sustainability, are encouraged to apply.

As part of the Jackson School of Geosciences, the Department of Geological Sciences has over 50 faculty and a community of research staff with a broad range of specialization and access to outstanding research facilities and support.

Applicants should submit a letter of application, curriculum vitae, statements of research and teaching interests, and contact information for at least three references.

Submit electronic copies of these materials online at <https://apply.interfolio.com/39541>. For questions related to the search, please contact [dgs@jsg.utexas.edu](mailto:dgs@jsg.utexas.edu). Review of applications will begin January 6, 2017, and continue until the position is filled.

## About Austin

At the heart of the Austin community, the university offers a home where the creative, artistic minds of the world live side by side with the scientific and technological innovators of tomorrow.

Austin is regarded as an open-minded, friendly and innovative city. The city has been consistently rated a national creative center that draws talented people from across the world to its high quality of life, abundant resources, lively entertainment and active lifestyle.

## About the Jackson School of Geosciences

The Jackson School is both old and new. It traces its origins to a Department of Geology founded in 1888, but became a separate unit at the level of a college on September 1, 2005.

The Jackson School is home to more than 600 undergraduate and graduate students, averages about \$45 million in external research grants and contracts annually, and has the world's largest endowment for the geosciences. The department's scholarly, research, and teaching activities capitalize on additional strengths within the Jackson School as well as the university's College of Engineering and College of Natural Sciences. Significant resources are available to support the mission of the department.

## About The University of Texas at Austin

Founded in 1883, the university has grown from a single building, eight teachers, two departments and 221 students to a 350-acre main campus with 17 colleges and schools, about 24,000 faculty and staff, and more than 50,000 students.

The university's reach goes far beyond the borders of the main campus with satellite campuses and research centers across Texas, including the J.J. Pickle Research Campus, which houses the Jackson School's Bureau of Economic Geology and Institute for Geophysics.

UT-Austin is a leading provider of education and research with a depth and diversity of resources unmatched by most other public universities. More than 8,700 bachelor's degrees are awarded annually in more than 170 fields of study and 100 majors.

As an enduring symbol of the spirit of Texas—big, ambitious and bold—the university drives economic and social progress in Texas and serves our nation as a leading center of knowledge and creativity.

What starts here changes the world.
