

Main issues discussed during session **Morphodynamics and Evolution of Estuaries:**

- Sediment transport in the estuary was discussed. What is the process stirring sediment accumulation in the estuary.
- Is the delta kind of filter for the sediment.
- Fjords are kind of estuary.
- Bores are important factors stirring sediment transport and redeposition in estuary.
- Sea level steers sediment accumulation in the estuary.
- Estuary equilibrium depend age of estuary .
- Harbor dredging influences on sediment regime in estuary
- Evolution of estuary morphology was discussed
