

The University of Akron
**Buchtel College of Arts
and Sciences**

Department of Geosciences

Tenure-track Assistant Professor - Geosciences

The Department of Geosciences seeks a tenure-track Geology or Environmental Science colleague with a science research focus related to **the effects of changes in the environment on processes occurring near the Earth's surface, including, but not limited to geomorphology, glaciology, engineering geology, paleobiology, climate change, and water resources**. This person will augment existing faculty strengths and work in areas such as climate change, pollution, or other factors that perturb natural systems.

The Department of Geosciences has 10 faculty members supporting over 100 undergraduate and graduate students enrolled in geology and environmental science BS, MS, and certificate programs. We have moved to the newly renovated 65,000 sq-ft Crouse Hall that houses state-of-the-art research and teaching spaces. See <https://uakron.edu/geology/> for more information.
